## CC VMP

### Announcements

1. CC VMP Documentation: published 28-8-2012 (downloads see below)
2. Testcentre: test scenario's (see Florecom TestCentre CC VMP Community)
3. Example messages available (download file see below)

## CC VMP Standard

### CC VMP Standard

CC VMP standard, the Cross Community Virtual Marketplace, is the outcome of close collaboration between five communities within the ornamental horticulture industry. The term 'Cross Community' emphasizes the need of interoperability between different VMP platforms. The aim of sharing common business rules and common implementation conventions is to bring interoperability to a higher level. Most of the CC VMP business rules in this document are derived from the FloraHolland E-trade VMP Customer implementation due to their generic character.

### Agreements on management and maintenance

On 16 February and 26 April 2012 the workgroup Standards (WGS) and the CC VMP community accepted a proposal for the [management and maintenance](#) of the CC VMP standard. [Agreements](#) are listed in this report.

---

## CC VMP Members

Company	Application	VMP 0.7 tested
